

## CREATE AN OASIS IN YOUR OWN BACKYARD

Ponds, water gardens, waterfalls and unique water features such as bubblers, fountains and spillways add a relaxing, peaceful and elegant touch to any landscape. The experts at James Valley Landscape Solutions have designed and installed just about every type of water feature you can imagine, from large scale fishing ponds to multi-level waterfalls to backyard fountains. If you are ready to bring the tranquil sights and sounds of water into your oasis, talk to us today and let us bring your plans to life!

### Everything You Need

As a full service landscape solutions business, we have all the top quality products to help bring make your vision a reality. Our goal is to create a unique, natural looking and self-sustaining water project that will bring you joy for years to come. We sell and install all of the following products:

Aeration Units | Filters | Pumps | Plumbing | Lighting | Liners | Landscape Rock | Water Plants

### Design and Installation

While DIY is always an option, we recommend professional guidance on water projects simply because there is a level of difficulty involved in most designs and installations. We can design an amazing looking space that will provide you with years of enjoyment. We feel it's always best to do the job right the first time, and we take great pride in making sure you will love the end result.

### Unique Products

If you would prefer a free-standing water feature that can be placed in your yard near an electrical outlet, our Garden Center carries bubblers and fountains of every size and shape. They make great gifts and are a wonderful addition to any landscape.

### Let's get started
